

ALEXIS JONO TAN

Atlanta, Georgia • 470-655-8789 • alexisjonotan@gmail.com

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Atlanta, GA

B.S. in Computer Science, Concentration in Intelligence, Systems & Architecture

Expected May 2029

- Relevant Courses: Computing with Python, Object-Oriented Programming with Java, Linear Algebra, Multivariable Calculus, Differential Equations, Combinatorics

GWINNETT SCHOOL OF MATHEMATICS, SCIENCE, AND TECHNOLOGY

Atlanta, GA

GPA: 4.43 | PSAT: 1520/1520 | SAT: 1560/1600

Aug 2022 - May 2026

- Activities: Math Team (Content Head), Computer Science Club, Mu Alpha Theta, National Honors Society
- Awards: National Merit Finalist (2025), American Invitational Mathematics Exam (AIME) Qualifier (2025)

EXPERIENCE

GEORGIA TECH RESEARCH INSTITUTE

Atlanta, GA

Research Intern, Information and Communications Lab

Jun 2026 - July 2026

- Co-developed a full-stack web application (Python, Flask, HTML/CSS/JS) within a 3-person Agile team, collaborating cross-functionally with a 10+ member hardware team to process and visualize live environmental sensor data from the Ocmulgee River
- Integrated open-source tools like Chart.js to visualize raw river metrics in a dynamic dashboard, enabling early flood-warning capabilities and supporting pre-disaster mitigation efforts
- Partnered with the Ocmulgee National Park and Preserve Initiative through participatory design research, engineering data-accessibility tools to support cultural preservation and the establishment of Georgia's first national park

VALENT ASSET MANAGEMENT

New York, NY

Quantitative Analyst Intern, Metals

Jun 2025 - Apr 2026

- Engineered quantitative trading strategies for base, precious, and minor metals portfolios, leveraging time-series analysis and regression on Bloomberg price data to generate trading signals yielding an 80%+ success rate and 5-10% average PnL
- Built customized trading and backtesting programs using Python/Pandas to evaluate strategy performance, directly optimizing portfolio returns against benchmark metrics
- Synthesized 50+ pages of weekly commodities and macroeconomic research from major institutions (Goldman Sachs, Macquarie, BMO, Bloomberg) into concise briefs, streamlining the research pipeline for senior quantitative analysts

FREELANCE

Atlanta, GA

Full-Stack Web Developer

May 2025 - Aug 2025

- Architected and deployed custom web applications for two foodservice businesses, using Render and Git, independently designing Python/Flask backends and responsive HTML/CSS/JavaScript frontends to establish their online presence
- Drove digital customer engagement by optimizing site visibility and designed responsive UI/UX, successfully growing combined platform traffic from 0 to 200+ monthly active visitors
- Engineered secure B2B onboarding forms for credential intake and integrated a custom contact routing system, streamlining both customer catering inquiries and vendor onboarding

PROJECTS

EVALUATING CAROTID INTIMA-MEDIA THICKNESS USING MACHINE LEARNING

- One of top 50 research projects in Georgia chosen for presentation at Georgia Junior Science & Humanities Symposium
- Engineered machine learning and deep learning pipelines using TensorFlow to automatically measure carotid intima-media thickness from ultrasound scans, achieving 90%+ diagnostic accuracy
- Curated and open-sourced a comprehensive dataset of 2,000+ labeled medical ultrasound scans, enabling future research in computer vision and image segmentation tasks

SKILLS

Languages: Python (pandas, numpy, sklearn, matplotlib, jupyter), C++, Java, HTML/CSS, JavaScript, TypeScript, SQL
Frameworks: Flask, React, Node.js, Express.js, PyTorch, TensorFlow, PostgreSQL, Git, Windows, Linux, REST APIs
Data: Data Analytics & Visualization, Machine Learning, Time Series Analysis, Model Evaluation
